

Dear Recruiters

It is my pleasure to recommend Mr. Jiaxiang Wang for employment with your organization.

Briefly introduce myself first, I am currently a principle Engineer of NXP semiconductor and an adjunct professor of electrical engineering in California State University. I graduated my Ph.D. from Texas A&M University. The research I am doing now is wireless communication integrated circuits design.

I met Mr. Wang in 2017 when I came to my brother's house in San Francisco. When I stepped into the living room, I saw him working on his computer in the corner. I glanced at his screen, it was coding. He didn't even look up when I passed, as if didn't notice a stranger come in. An hour later, when he finished, he came over and greeted.

We met again when Mr. Wang transferred to University of California Irvine. We gradually became friend due to our highly overlapped hobbies. The more I get along with Mr. Wang, the more amazing I found him. He focuses on his goal once he sets it. He is the type that knows what he wants and can make the sacrifice on his way of pursuing. Even though he enjoyed playing the video game, he is willing to give up those time to put more time into the coding effort. On the other hand, he has insisted on working out for 5 years and keeps healthy diets all the time. Because he knows that he wants a nice and healthy body rather than short happiness.

Mr. Wang is passionate for advanced technology. We always had the fervent discussion about technologies. He read a lot of news and articles; sometimes his knowing even surprised me. One time he suddenly talked about the development of "The Internet of Things" (IoT) and its future application. As it is the area where I am currently working on, we went in-depth on those topics. He impressed me that he pointed out the security and privacy of IoT devices will pose challenges in near future.

I recommend Mr. Wang without reservation due to his passion and eager for new advanced technologies. I am sure that he would be productive to you and your organization. Please let me know if you need additional information about this outstanding boy.

Sincerely

Jun Zhou

Adjust Professor of CSU
