

# TONY WANG

tonyjiaxiangwang@gmail.com | (408)816-6594 | Irvine, CA 92604

## EDUCATION

---

### University of California, Irvine

B.S. in Computer Science.

Irvine, CA

Sep 2019 - June 2020

Relevant Courses: Software Development, Database & Web Applications, Computer Network, Beyond SQL Data Management, Machine Learning/Data Mining, Computer & Network Security, Application Of Probability In Computer Science

GPA: 3.469

## EXPERIENCE

---

### Ardent Labs

Software Development Intern

Irvine, CA

Oct 2018 - Present

- Designed a website for students to manage their volunteer events by using **MongoDB** to store and query data while implementing the back-end with **JavaScript** and Express(framework) and front-end with JavaScript and **React.js**.
- Refactored the Grade Component of Ardent Office with reducing 30% code with a focus on readability using **React**, **GraphQL**, modern ES6 features and Google's material-UI.
- Fixed 20+ bugs in legacy code such as the erroneous charts and various back-end features via unit testing the functionalities of the website.

### Baidu Inc

Web Front-end developer

Shenzhen, China

July 2017 – Aug 2017

- Worked in a group of 4 to build an internal communication software used inside Baidu and deployed on Baidu Cloud.
- Developed and Implemented the chat UI and collaborated with **UED**(user experience designer) to improve user experience.
- Used version control tool and adapted agile software development process to manage the project, completed the entire project a week before the expected deadline.

### Ardent Academy

Instructor

Irvine, CA

June 2019 – Sep 2019

- Taught **Python** to 30+ teenagers and led them to finish several projects like AI-chatbot, DNA machine, and AI-Poker.
- Held lectures explaining data structures such as array, linked-list and hash-map with illustrative examples and sample codes.

## PROJECTS

---

### Movie Zone

Mar 2019 – June 2019

- Designed a Movie website supported advance searching, managing shopping cart and payment activities.
- Used **Java** and **MYSQL** to implement back-end features, including efficient database algorithms capable of handling requests for 100,000+ data entries, and a remote server containing 60+ **RESTful** Application Programming Interface(API) hosted on a **Linux Virtual Machine**.
- Built 4 databases with **Microservices** technique and improved user experience by increasing the throughput of back-end with API-Gateway and **multi-threading** and supporting payment with PayPal by using PayPal's API.

### Spotify Browser

Sep 2019 – Dec 2019

- Built a music website for customers to browse and search for the information in the Spotify Library.
- Designed and implemented user-friendly interfaces and page redirection in **Angular**.
- Built the back-end with **Node.js/Express** handled **authentication** via **OAuth** and communicated with the **Spotify API**.

### Peer Genius

Jan 2019 – Aug 2019

- Built a website in a group of 4 for matching teenagers into study partners.
- Constructed the front-end scheduler with JavaScript, React.js, **Redux**, **Webpack** and Material-UI.
- Implemented database queries using **Sequelize** and enabled communications between users with socket.io.

## SKILLS

---

- Programming Languages: Java(proficient), JavaScript, C++, C, Python
- Tools & Frameworks: React, MYSQL, MongoDB, Node.js, Express, Docker, Microservice, Git, jQuery, AWS, GraphQL
- Languages: Fluent in English, Mandarin, and Cantonese
